The thread used for kite flying is coated with glass powder through a special process and from that a special process and from that a special thread is produced which is called "Manja". As this manja is very sharp, during kite flying, it can harm the birds flying or two wheeler riders on the road and result in accident. On this basis, there is a concern of the occurrence of cognisable offence.

It is pertinent to take care of the life of birds flying freely in the sky as well as population moving on roads. That's why as a precautionary measure the following has to be done.

- a) The businessmen producing deadly manja in the vicinity of Police Thana are made aware about the possible danger for human beings/birds and to take care that they will not produce such thread.
- b) Ban the sale of deadly manja in the vicinity of Police Thana.
- c) Kite flying lover be made aware about the possible danger about loss of life and to discourage then using deadly manja.
- d) To provide police protection immediately as demanded and as the situation warrants whenever Bhrihanmumbai Mahanagar Palika takes action against production of deadly manja.

The circular is to be read at the drill session and should be displayed for at least 3 days in such a way that all should be able to see it.
